"Expression of vascular endothelial growth factor (VEGF) and its receptors during embryonic implantation in the golden hamster (Mesocricetus auratus).";

Cell Tissue Res. 296:339-349(1999).

Cell Tissue Res. 296:339-349(1999).

-:- FUNCTION: Growth factor active in angiogenesis, vasculogenesis and endothelial cell growth. It induces endothelial cell prowth. It induces endothelial cell prowth. It induces endothelial cell prowth. It induces endothelial cell cell induces permeabilization of blood vessels. It binds to the vertex permeabilization of blood vessels. It binds to the vegres permeabilization of blood vessels. It binds to the vegres permeabilization; inhibits and the heparin (By similarity).

-:- SUBUNIT: Homodimer; disulfide-linked. Also found as heterodimer; with PIGF (By similarity).

-:- SUBCELULAR LOCATION: Secreted but remains associated to cells or the extracellular matrix unless released by heparin (By the control of the control o
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               SQGALSAGNNSTEMEVVPFNEVWGRSYCRPMEKLVYIADEHPNEVSHIFSPSCVLLSRCS

                                                                                                                                                                                                                                                                                                                                                                                Berse B.;
Submitted (JAN-1992) to the EMBL/GenBank/DDBJ databases.
-!- FUNCTION: Growth factor active in angiogenesis, and endothelial cell growth. Induces endothelial proliferation and vascular permeability (By similarity).
-!- SUBUNIT: Homodimer; disulfide-linked. Also found as heterodimer with PIGF (By similarity).
                                                                                                                                                                                                                                                                             Cavia porcellus (Guinea pig).
